Morse Micro

MM6108-EKH05

The MM6108-EKH05 evaluation kit is a fully integrated Wi-Fi HaLow development platform, designed for a wide range of IoT applications.

The MM6108-EKH05 includes:

1. Wi-Fi HaLow Module
2. STM32U585 Host Microcontroller
3. ST BLE Module – BLUENRG-M2SP
4. STLINK-V3MODS
5. Camera Module
6. Versatile Power Measurement
7. mikroBus & QWIIC Connectors
8. Full Access to STM32 peripherals (I2C, SPI, etc)

MM8108-RD09

Faster, smaller, lower power and longer range than our first-gen MM6108

MM8108 supports:

- 8MHz BW MCS9 (256 QAM)
- PHY throughput of 43.3Mbps
- Integrated PA (21dBm) & LNA
- USB, SDIO, SPI host interfaces
- Ultra-low-power DTIM & TWT modes
- Full stack

The MM8108-RD09 is the most advanced Wi-Fi HaLow Evaluation kit in the smallest and easiest to use package
